

Major Pharmaceutical Company
North America

BUSINESS CASE

Our client is a Fortune 500 Pharmaceutical company in North America which manufactures major drug products for various health symptoms. They have a data protection infrastructure from Dell EMC and they needed to migrate their data to the cloud. As part of our Services offering, NYGCI partnered to provide smooth and efficient migration strategy to the customer.

SOLUTION PROPOSED

Having the customer infrastructure based on Dell EMC solution: Dell EMC Networker with Data Domain Virtual Edition DDVE are the best suited Data Protection tools for the customer in Public Azure Cloud. NYGCI has deployed the solution and configured the backups in the cloud through Networker for Various VMs, databases and SAP HANA applications.

CHALLENGES

- Having client's infrastructure fully on prem with a high risk of data loss
- No Disaster recovery plan implemented
- Any application downtime will lead to significant financial losses

SOLUTION BENEFITS

- Guaranteed high availability since the backups are located in the cloud
- Seamless work with servers and virtual machines
- Efficient ransomware protection available
- This solution is the most economical option to minimize costs and protect data at the same time

CUSTOMER SATISFACTION

Our Customer was amazed by the professional and technical skills proven by NYGCI team together with the solution proposed and deployed that helped the customer to achieve the estimated savings with this migration project.
